MEDIA PROVIDER:

Pre-Registration

Drivers must preregister online before the event to sign waivers, tech forms, and check-in for the event.

Please visit the following URL to complete pre-registration up to **1-week before the event**:

<https://www.turn8racing.com/register>

Drivers will receive their wristbands at registration in front of the club house. We will verify your registration and issue your wrist band. If you have ordered any items that you need to pick up at the track from us, those will be available in front of the club house / main building.

Tech Inspections

Drivers will be required to self-tech their own cars, but we reserve the right to perform random spot checks to ensure that cars meet the minimum requirement.

COVID-19

Due to the ongoing pandemic **strict social distancing must be observed**. Please visit the following link for detailed rules we will be following at this event:

<https://www.turn8racing.com/covid19>

Rules

1. Never get out of your car (driver or passenger) at ANY time UNLESS your car is on fire.
2. Never take your helmet off or undo your chin strap or seat belt (Driver or Passenger).
3. If you have to be towed off the track more than once, you may lose all of your remaining sessions.
4. If you go "four wheels off" excessively, you may lose all of your remaining sessions.
5. Passengers not allowed in beginner group unless approved by us.

Flags

Flags are very important for communicating with drivers, so here are the ones we use. Try to memorize these, and their meanings:

Green Flag
Track is hot. Full track speed OK.

Yellow Flag
Static: Proceed with caution and do not overtake. Reduce pace to half track speed.

Red Flag
Immediately slow down and stop OFF THE RACING LINE. Maintain line of sight with a flag station and await instructions to proceed. Do not overtake, get out of your car, or remove any safety equipment (including seatbelts or helmets).

Black Flag
Exit the track at next pit exit and drive TO THE PIT LANE for instructions. May be pointed at you for an individual infraction or waving at all stations for track shutdown.

Yellow/Red Flag
Slippery surface ahead (e.g. oil). Drive carefully.

Meatball Flag
Mechanical issue with your car. Exit the track and drive TO THE PIT LANE for instructions. If leaking oil, drive OFF THE RACING LINE at reduced pace. Do not stop unless on fire or unable to proceed.

Blue Flag
Faster car approaching behind – allow to pass at next passing zone.

Checkered Flag
Session has ended normally. Return to the PADDOCK at next pit exit. DO NOT do a cool down lap – exit at earliest possibility.
